No.1 Fixer is Strong & Strategic Leadership : For Self-Sustainable Country

No.1 Source: The country is facing a crisis when there are many groups, opinions and small small leadership wanted to block each other while creating different opinions which is not only block its progress but divide its people, culture, unity and integrity which effects the economy as well as safety security of that country, and of its people inherited on it, so ultimately it created chaos, uncertainty, risk and vulnerability and appears weak in the International outlook, due to difference in opinions the country can not come to a single opinion or a direction where, that moves is much necessary to take in order to save the country from Strategic Crisis and Problem Solving

No.1 Fixer:

Narrated Abu Sa'id Al-Khudri: The Prophet SAW(PBUH) said, "Allah never sends a prophet or gives the Caliphate to a Caliph but that he (the prophet or the Caliph) has two groups of advisors: A group advising him to do good and exhorts him to do it, and the other group advising him to do evil and exhorts him to do it. But the protected person (against such evil advisors) is the one protected by Allah.' "

Reference: Sahih al-Bukhari 7198, Book 93, Hadith 59, Vol. 9, Book 89, Hadith 306

Fundamental Risk or Asset or Resources for a Country is its Leadership, who can guide the administrative team and take strategic decision and always focus on creating value that the world need it and depend on it to create economic sustainability and always focus on to maintain good relationship with its alliance's countries and international members to mitigate any future risk, disasters and conflicts to keep Safe its own people and also in effective for strategic partnership with those who need help in any crisis for their countries.

No.1 Breaking Point: The knowledge of administration is the Fundamental to make a country self-dependable where Skilled and intelligent people are the key Assets to implement any policies which will demonstrate countries economic excellence, strict law and order, healthcare infrastructure, Educational infrastructure, IT and Technology Infrastructure, Employment and work opportunities, Agriculture and manufacturing sector growth and subsidiaries, Independent banking sectors etc., so my point is when they leave your country for a good job or Salary due to lack of provision or opportunities , then countries economic infrastructure will be definitely down and this will enough to destroy self-dependency model and then the country might need to run on debt and work on Dependency Model
